

### PRE-ROLLED PERFECT CONE

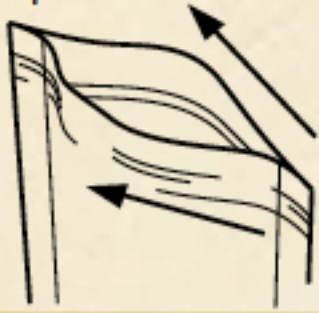

This is another innovation in Cigar smoking! When Cyclones burn, more tobacco is burned at the beginning, and progressively less is burned at each puff. Therefore as your tobacco becomes stronger and stronger, you are burning less of it. Thus the first puff tastes almost the same as the final puff.

## FLAVOR SUPERIORITY

### RESEALABLE ZIP PACK

All our pouches now feature a resealable zip that allows to close the pack once torn open. This allows you to use only one wrap at a time and keep the others fresh for as long as you need.

### LASTS 10X LONGER!

Newer wrap production techniques have created wraps that don't dry out – even when left out of the package for an hour or more. It's way better than dry cracking wraps.

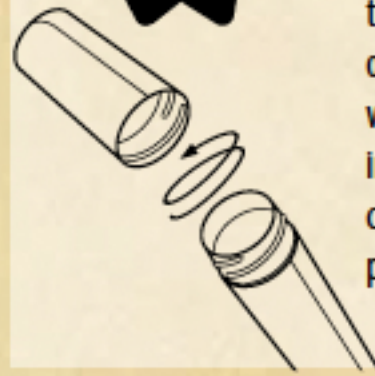

### SEALED FOR GUARANTEED FRESHNESS

All our wrap pouches and tubes are sealed in factory to guarantee a fresh product every time.

### TOBACCO FRESH TUBES

Our tubes are TOBACCO-FRESH! These are more than what they seem. They are specially made plastic tubes that are not only air tight but provide an odor-proof place to carry your wrap and also put it out easily. Once a burning cigar is placed into the tube and the lid screwed on, the lack of air puts the cigar out in seconds. Try them for yourself to discover why people love 'em!

### TRIPLE-DIP® FLAVOR SYSTEM

We go to extreme painstaking lengths to give our wraps that extra sweet, mouth watering flavor that nobody was able to copy.

### DANK 7 TIP

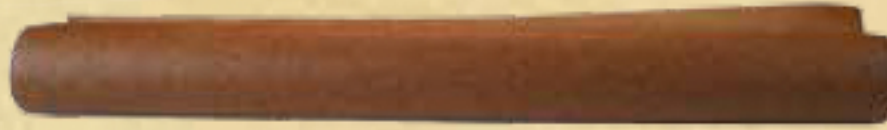

These natural bamboo tips have been soaked in flavor for 7 long days to provide you with the most flavorful smoking experience ever!
