

ROLLING PAPER ICONS - Look for them to know what the papers are made of.

HEMP is smooth burning and one of the strongest plant fibers in the world.

RICE papers burn slowly with minimal ash and a clean taste.

FLAX is a grassplant with qualities that are similar to hemp.

TREE FREE papers are environmentally friendly and contain no wood particles.

Papers that **CONTAIN WOOD** are less "Earth Friendly" and may give a harsher smoke.

A **SPECIAL** or **PROPRIETARY** blend of alternative or unique materials

UNKNOWN we aren't sure of what is in this paper, manufacturer would not provide data.

"NOTE": The individual rolling paper information provided in the following sections has been supplied by each paper's manufacturer. We have tried our best to acquire the most recent and accurate information on each paper. Unfortunately, not every company contacted replied to our request for updated information. Paper composition may vary from batch to batch. "For legal reasons we must say that although we made a good faith effort, it is probable that some information is incorrect." HBI
